

It Pay\$ to Plug In:

NJ's Electric Vehicle Workplace Charging Grants

It Pay\$ to Plug In provides grants to employers to offset the cost of purchasing and installing electric vehicle charging stations. This program is designed to encourage employees to purchase and drive electric vehicles to work. The availability of workplace charging stations can be a driving factor in encouraging car shoppers to purchase electric vehicles. Workplace charging helps alleviate range anxiety and gives employees additional driving flexibility.

ELIGIBILITY CRITERIA

- Charging stations must be installed in New Jersey.
- Charging stations must be owned by the applicant, not leased.
- All employers are eligible (public, private, government, educational).
- Only Level 1/120 volt and Level 2/240 volt charging stations are eligible.
- Applicant cannot be receiving funds from other entities for the same charging stations.
- Approvals are first-come, first-served.
- Complete instructions and application forms are available at DriveGreen.nj.gov/programs.html

For additional information on many of the issues businesses need to consider with regard to workplace charging, see "Plug-In Electric Vehicle Handbook for Workplace Charging Hosts" by the US Department of Energy.

For additional information, please contact NJDEP Bureau of Mobile Sources at DriveGreen@dep.nj.gov or call (609) 292-7953.
